

SAINI DEVICES

Leading Distributors of Electronic Components

Welcome to Saini Devices

Saini Devices is a well established name in Bengaluru and in around India. We are leading importers and distributors of world class electronic components in India and have been in the business for three solid decades.

We are based in Bangalore, Having offices in Delhi, Mumbai and Hyderabad.

Our forte is catering to MIL-grade parts and components attested with the Certificate of conformance (COC).

We serve the comprehensive and demanding and extensive Indian electronic industry with elusive and sought after needs of the market. We also help a variety of government organizations as a part of our clientele.

Mission

Our Mission at Saini Devices to be one of the prime importers and distributors of electronic components in India. We seek to provide elite and profitable services nationwide.

Authorised Brands

Taiwan Chinsan Electronic

Sirectifier[®]

• IGBT Modules & Thyristor Modules

- All types of Mosfet's (LV/MV/HV)
- ST & IFX Cross Reference Available

NON AUTHORISED / DIRECT SOURCED MANUFACTURER

SAINI DEVICES PRESENTING

World's Best Low Cost Brand with All Qualified Universal Standards.

We Provide Solutions :

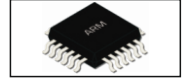

Applications : Telecom & EV Charging solutions.

Solutions : SiC based solutions for 3.3kW AC-DC / DC-DC Converters / PMSM Controller.

Cross-Reference Devices : MCU

Applications : Automotive, Industrial, Consumer, EV's.

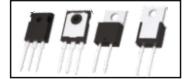

Solutions : 32bit micro controllers pin-to-pin replacements for STM 32bit Series with no hardware & software changes.

Cross-Reference Devices : MOSFETs & DIODES

Applications : Automotive, Industrial, Consumer, EV's.

Solutions : 30v-1000v silicon based MOS with **Extreme Low $R_{DS(ON)}$** With best pulsed drain current, Also 100% pin-to-pin replacement for STM & IFX MOS.

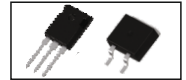

SiC Devices : MOSFETs & DIODES

Applications : Automotive, Industrial, Telecom, EV's.

Solutions : *650v & 1200v Silicon Carbide based MOS with **Extreme Low $R_{DS(ON)}$** with best pulsed drain current.

*650v & 1200v Silicon Carbide based Schottky Barrier Diodes (SBD).

Current Sensing Devices : Resistors & Shunts

Applications : Automotive, B.M.S, Industrial, Telecom, Ev's (OBC).

Solutions : High ampere Low resistance value resistors for extreme durability & reliability.
